Professional Profile

Senior Graphics Programmer with extensive experience developing and optimizing high-performance AAA projects. Proven track record of taking ownership of rendering and performance pipelines for complex titles on modern platforms (PS5, Xbox Series, PC), made in proprietary engines, featuring large and complex codebases. Expert in low-level optimization, GPU/CPU profiling. Committed to delivering seamless, high-throughput and creative rendering solutions for resource-intensive applications, within the given constraints.

Software Engineering Experience

SENIOR GRAPHICS PROGRAMMER | FEBRUARI 2021 - CURRENT | CLIMAX STUDIOS

Took ownership of the VR rendering and performance pipeline for the *Microsoft Flight Simulator 2024* port to PSVR2.

Acted as a key engineer within the optimization team for *Age of Empires IV* (Microsoft), profiling and executing performance improvements across GPU, CPU, and memory tiers for PC, Xbox One, and Xbox Series.

Engineered critical performance and rendering optimizations as part of the graphics team for the PC port of *Returnal* (Unreal Engine). Resolved complex bottlenecks in memory management, loading, and real-time rendering.

Relevant Skills

- C++, C#
- Unreal Engine, Proprietary Engines
- Console Experience: Xbox One (GCN), Xbox Series, PS5 (RDNA2), and Switch 2
- Modern Graphics APIs: DirectX 12, AGC, Vulkan
- GPU Profiling tools: Pix, NSight, RenderDoc, Razor
- Shading languages: HLSL, GLSL, PSSL.

Languages

- **Dutch** Native
- **English** Fluent (C2)
- **French** Intermediate (B1)
